The #1 Preconstruction Collaboration Platform

Join

Trusted by innovative builders nationwide.

Better Collaboration and Confidence

Join transforms the preconstruction experience by enabling the entire project team to drive decisions through shared information and real-time communication.
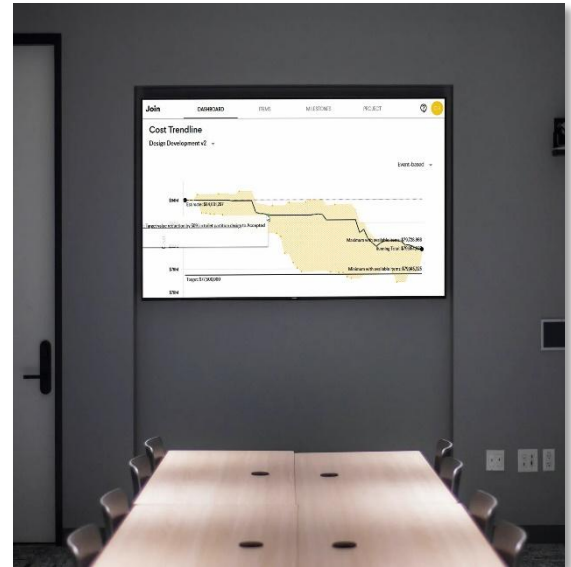

Collaboration. You can't plan and execute a project in a vacuum. We know that collaboration is the key to a successful preconstruction process.

Decision Making. A critical component of successful project delivery. Confident decision making is informed by accurate data representing the impacts to the quality and budget of the project.

Execute. Successful preconstruction, built on collaboration and trust, sets up the construction team to execute and deliver the project on time and on budget.

" A recent study by KPMG shows 82% of owners prioritize collaboration with their general contractors."

Platform Features

- Collaborative platform
- Estimate and budget data visualization
- Centralized project communication
- Power decision making
- Build confidence and trust with collaborators
- Clearly present options and alternatives
