

T-MOBILE FOR BUSINESS PARTNER SOLUTION: Franklin T9 Hotspot + MDM

SOLUTION OVERVIEW / BENEFITS

The Franklin T9 is a LTE Mobile Hotspot that supports 15 device connections through built-in wi-fi AP. With advanced LTE technology and multi-band support, the T9 provides seamless wireless data connection. This device is lightweight, extremely portable, and easy to travel with. The **INCLUDED DEVICE MANAGEMENT** solution will allow users to remotely manage and configure their devices in the field. The cloud-based management platform is secured by 2-factor authentication and industry standard security and protocols.

- Custom security settings
- Enable and disable hardware features
- Content filtering for safe internet
- Time of day control
- Interactive dashboards for IT admins
- Data Usage Reporting

Eliminate the Awful Expense of Wasted Productivity

- Relying on employee’s individual networks to “get it done” may mean relying on failed connections, tampered speeds, or unsecured networks.
- Worry no more of easily distracted staff and/or students, you’ll have the power to whitelist sites & apps while securing productivity.

4G LTE HOTSPOT + DEVICE MANAGEMENT

- Get geo-tracking location data real-time to locate traveling employees from thousands of miles away.
- Take advantage of data usage reporting.

Targeted Verticals

- Education
- Enterprise
- Government
- SMB
- Strategic
- Remote Work
- Travel
- School

Qualifying Questions

- How do you track remote work productivity?
- How frustrating is it when your team can’t connect on calls when traveling?
- What challenges are you facing for your students or teachers?
- How often do you lose your top performers who violate internet & communication policy?

Why Do We Win

- Economically disadvantaged students learning from home without internet access will have an easier and empowered education.
- Remote or traveling employees will no longer need to send sensitive and confidential data over unsecured networks.

Pain Points that the Hotspot Addresses

- Remote / traveling employees who are unable to connect to calls/complete work, drive productivity costs, and lack accurate geolocation tracking.
- Students or teachers who have limited connectivity or frequent sites preventing productivity.
