

T-MOBILE FOR BUSINESS PARTNER SOLUTION: 4G LTE DASHCAM SOLUTION

SOLUTION OVERVIEW / BENEFITS

Powered by AI and Computer Vision, SurfSight automatically detects and alerts distracted driver behavior and harsh driving incidents in real-time. SurfSight front and rear dash-cameras provide a 360° view of your vehicles and video evidence retrievals on the Geotab dashboard.

SurfSight's open platform works seamlessly with other fleet management tools, enabling a single source of truth for fleet data. Open API supports management of all vehicle cameras allowing custom rules into video events, permission and roles for data, and email alerts from a single user interface.

THE ESSENTIAL LTE DASHCAM

Targeted Verticals

- Construction
- Manufacturing
- Hospitality
- Transportation
- Government
- Commercial
- Postal Service
- Sanitation
- Delivery Services
- Warehouse
- Retail

Qualifying Questions

- Do you have a fleet of vehicles on the road daily?
- What is the cost to your company for vehicle accidents yearly?
- Have you incurred legal costs due to company vehicle collisions?
- How do you prove innocence or fault for company vehicle accidents today?

Why Do We Win

- SurfSight has an open platform to connect to any fleet program your customers are using
- Easy ROI shown due to proven company vehicle prevention of accident legal fees
- Fleet vehicle recovery and detection

Pain Points that the Dashcam Addresses

- Distracted driver
- Fleet vehicle monitoring and maintenance
- Reduction in legal costs due to company accidents
- Ability to monitor company vehicles being used for noncompany business
