

T-MOBILE FOR BUSINESS PARTNER SOLUTION: 4G LTE TABLET FOR EDUCATION

SOLUTION OVERVIEW / BENEFITS

Welcome to the new normal. Communication has never been more important— or looked so different. As education facilities worldwide navigate unexpected complexities and challenges, it's an ideal time to re-evaluate how your remote students, faculty and staff work in the post-Covid world.

4G LTE Tablets offer great style, power, portability and can be put to a range of good uses, both around the home and out and about. A new report from Harvard Business Analytic Services finds that remote work can be as effective as onsite work, and that organizations and education facilities with advanced digital workplace strategies are having the best outcomes.

4G LTE TABLET FOR STUDENTS & TEACHERS

Targeted Verticals

- Education (K-12)
- Colleges and Universities
- Government
- Healthcare
- Retail
- Disabled Population

Qualifying Questions

- What is your school's plan to prepare students and faculty for a shut down of in-person learning?
- Have you received grant money for digital infrastructure recently?
- Have you considered the cost differences between remote computers vs tablets in your upcoming budget?

Why Do We Win

- Low-cost alternative to costly computers
- Aligned with school budget needs and grant money for remote capabilities
- Options for rugged tablets for small children to advanced choices for college students

Pain Points that the Tablet Addresses

- Avoid high costs for computers
- Solve remote technical issues when paired with our MDM solution
- Touchscreen and digital pen options for tactile learners
- Not dependent on Wi-Fi due to LTE ability
