T-MOBILE FOR BUSINESS PARTNER SOLUTION:
TELTONIKA RUT240 ROUTER

SOLUTION OVERVIEW / BENEFITS

The Teltonika RUT240 is a bestseller industrial 4G LTE wi-fi router with ethernet and I/O for professional M2M IoT applications. It delivers high performance for mission-critical cellular communication in rigorous environments and is widely used for 4G backup, remote connection, advanced VPN and tunneling services. WAN failover ensures automatic switch to alternative backup connection in case of any connectivity issues. The wi-fi is functional in both access point and station mode at the same time. External SMA antenna connectors make it possible to attach desired antennas and easily find the best signal location. Connect to multiple devices including PCs, laptops, VoIP phones, printers, etc. Works with Teltonika RMS (Remote Management System), which easily allows for remote device management, usage alerts, changing configurations, admin access and FOTA management.

4G LTE INDUSTRIAL CELLULAR ROUTER

Targeted Verticals

- Construction
- Manufacturing
- Education
- Hospitality
- Agriculture
- Transportation
- IT
- Government
- Retail
- Warehouses
- Infrastructure
