

Picote Pressure Guard

Monitor air compressor or liner pressure at all times, even when away from the jobsite!

The Picote Pressure Guard is a simple, single-line device for monitoring constant air pressure and temperature from a single source. **Keep it simple!**

The Pressure Guard can be attached to monitor either the air compressor or the liner/equipment (positioned before or after the air regulator).

The Picote Pressure Guard is a smart device based on IoT Technology.

USES, BENEFITS, PRODUCTS & SPARE PARTS

Features

- Includes replaceable Lithium-Ion batteries.
- Easily add 1-10 contact phone numbers per guard for pressure alarm notifications.
- Set and adjust limits with your phone or computer.
- In case of an alarm, the Pressure Guard sends text messages and also calls each number in its system.
- Conveniently scan the unit's QR code for set up.

Benefits

- Lightweight and easy to operate.
- Monitor the operational status of the compressor or liner at all times, even when you are away from the jobsite!
- The Pressure Guard measures a reference pressure when activated and monitors pressure levels against user adjustable limits. Limits can be set to be either drop/overshoot percentage from the reference value or absolute min/max values.

Technical Specifications

Category	Measurement
Size	190x80x55mm 5"x3.15"x2.17"
Weight	700g (1.5lbs)
Package	Includes sensor, coupling, & cord
Models	EU, US

Products & Spare Parts

Part Number	Description
6100000040	Picote Pressure Guard
6100000040US	Picote Pressure Guard US
n/a	Spare sensor, coupling & cord
